"Anyone who stops learning is old, whether at twenty or eighty. Anyone who keeps learning stays young. The greatest thing in life is to keep your mind young."

- Henry Ford

WHY THIS PROGRAMME ?

In an era of rapid change, borderless organisations, Internet, E-commerce, Global market, etc., coping with revolutionary technology, changing attitudes and expectations are some of the greatest challenges facing officers of banks. Where expectations are high in terms of quality and timelines of output, knowledge of new technology and an understanding of the differences amongst people go a long way in enhancing efficiency and productivity. The essence of Carl G. Jung's theory of psychological Types is that much seemingly random variation in behaviour is actually quite orderly and consistent, being due to basic differences in the way individuals prefer to use their Perception and Judgment. If people differ systematically in what they perceive and how they reach conclusions they will naturally differ correspondingly in their interests, reactions, values, motivations and skills.
