WHY THIS PROGRAMME?

The high level of NPAs in the banking industry is a matter of grave concern for everyone. The challenges pertaining to recovery of bank loans have been troubling all the stake holders of governance in general and bankers in particular. Inadequacy in recovery of loans severely restricts the scope for further lending by the financial institutions. This results in stunted and lopsided development of the critical sectors of the economy. It has been unanimously agreed that in order to build and sustain a robust banking system, there has to be a synthesis between the hard skills and the soft skills of all the people associated with the banking sector.

The importance of soft skill tools for any individual to evolve in life cannot be overemphasized. These tools assume greater importance for the banking personnel in the rapidly changing environment, especially with the advent of Small Finance Banks and Payments Banks.
